Projects

Safarica – Tour Booking	Location
URL	Date period
Built an end-to-end booking app with catalog, cart, Stripe payments, and automated emails.	
• Outcome: Delivered a fully functional platform used for booking demos; automated payments reduced manual work by 60-70%.	
BarberShop	Location
URL	Date period
Developed appointment and staff management platform with Twilio SMS confirmations.	
• Outcome: Automated 90% of booking confirmations, improving client reliability.	
NutriTrack – Calories Counter	Location
URL	Date period
Built a nutrition & exercise tracker with AI-based calorie estimation.	
• Outcome: Designed an AI-powered input system that reduced manual tracking time 100%.	
Armoury Crate Repair Script	Location
URL	Date period
Created PowerShell script to fix common ASUS ROG Armoury Crate issues.	
• Outcome: Reduced troubleshooting time for repeated issues.
