PROFESSIONAL PROFILE

Software Engineering graduate and current Subject Matter Expert at TCS, transitioning into AWS Cloud & DevOps Engineering. Hands on experience building production style microservice deployments with Terraform, Kubernetes/Helm on Amazon EKS, Docker, and GitHub Actions, backed by strong technical problem-solving skills built through years of escalation level support work. Targeting an AWS Cloud/DevOps Engineer role with a long-term roadmap toward Platform Engineering and Solutions Architecture.

WORK EXPERIENCE

Subject Matter Expert - Tata Consultancy Services, Budapest, Hungary

2023 - Present

- Monitor infrastructure and application health via Datadog alerts, identifying and reporting SI-MI incidents to Ops team.
- Act as the key point of contact between the Operations Bridge, Group Network, and Dev teams during incident resolution.
- Report major and high-priority incidents to clients and stakeholders during daily morning bridge meetings, covering root cause analysis and SLA status.

Service Desk Analyst - French Support, Tata Consultancy Services, Budapest, Hungary

2021 - 2023

- Provided first level technical support on software and network issues across phone, email or chat.
- Diagnosed and resolved technical issues, escalating unresolved cases to 2nd/3rd level teams while meeting contractual SLA timeframes.

CLOUD & DEVOPS PROJECTS

NutriTracker: Cloud Native Microservices Platform on AWS EKS

- Provisioned core AWS infrastructure (VPC, EKS, IAM/IRSA, ECR) using modular Terraform configurations for repeatable, version-controlled Infrastructure as Code.
- Packaged and deployed 4 microservices plus MongoDB via Helm charts, routing external traffic through the AWS ALB Ingress Controller.
- Implemented secret-less configuration using External Secrets Operator synced directly from AWS Secrets Manager, eliminating hardcoded credentials.
- Built an automated GitHub Actions CI/CD pipeline with deployment health checks and Grafana based monitoring.

Artevier: Glazed Ceramics DevOps Hosting on AWS EKS

- Containerized deployment on AWS EKS with a Jenkins CI/CD pipeline and full monitoring stack.
- Delivered reliable, repeatable builds with app hosting infrastructure provisioned for production style reliability.

Graph Me: VS Code Extension (in progress)

- Building a VS Code extension that visualizes Kubernetes YAML as a live infrastructure graph, watching real time resource state and surfacing issues directly on the graph.

EDUCATION AND TRAINING

Software Engineering Degree - National Engineering School, Tunisia

2022 - 2025

Master's Degree in Intelligent Systems - National Engineering School, Tunisia

2019 - 2020

Electrical Engineering - Higher Institute of Technological Studies, Tunisia

2016 - 2019

PERSONAL SKILLS

Languages	English, IELTS 7 French, TCF C1 (Fluent)
Cloud & Infrastructure	AWS (EKS, ECR, IAM/IRSA, VPC, Secrets Manager, Karpenter (auto-scaling), ALB)
IaC & Orchestration	Terraform, Kubernetes, Helm, Docker
CI/CD & Automation	GitHub Actions, Jenkins, Bash, Linux
Monitoring & Tools	Grafana, prometheus
Developer Stack	Angular (v17+), Node.js, Express, MongoDB
